Allianz Global Investors Fund - Allianz Green Bond Share Class IT (H2-USD)

Managed by Allianz Global Investors GmbH, part of
Allianz Global Investors

ISIN: LU1896600738
WKN: A2N7NY

Objectives and Investment Policy

Long-term capital growth by investing in investment grade rated Debt Securities of the global Bond Markets denominated in currencies of OECD countries with a focus on Green Bonds.

We follow an active management approach with the aim to outperform the Benchmark. We will acquire assets that are constituents of the Benchmark and we may use our discretion to invest in assets not included in the Benchmark. In selecting and weighting the fund's assets we deviate materially from the Benchmark.

Min. 85% of Sub-Fund assets are invested by us in Green Bonds. Green Bonds are bonds which are intended to encourage sustainability and to support climate-related or other types of special environmental projects. We follow the Allianz Green Bonds Strategy which has as its core objective to intentionally provide a positive environmental outcome while at the same time generating a financial return by investing in Green Bonds. Min. 80% of Sub-Fund assets are invested by us in bonds with a good credit rating. Sub-Fund assets may be completely invested by us in Emerging Markets. Max. 15% of Sub-Fund assets may be invested by us in bonds other than described in the investment objective. Max. 10 % of Sub-Fund assets may be invested by us in ABS and/or MBS with a good credit rating. Max. 25% Sub-Fund assets may be held in deposits and/or may be invested directly in

Money Market Instruments and/or (up to 10% of Sub-Fund assets) in money market funds on a temporary basis for liquidity management and/or defensive purpose. Max. 10% non-EUR Currency Exposure. The duration of the Sub-Fund assets should be between zero and plus 10 years.

Exposure to the base currency of the fund (EUR) will be hedged to a large extent against the reference currency of the shareclass (USD) which reduces the potential risks and limits potential gains from exchange rate movements.

Benchmark: BofA ICE BOFAML Green Bond Index (hedged into USD).

You may redeem shares of the fund usually on each business day.

We reinvest the income into the fund.

Recommendation: the Share Class of the Fund should be held for at least a medium-term investment horizon.

Derivatives may be used to offset exposure to price fluctuations (hedging), to take advantage of price differences between two or more markets (arbitrage) or to multiply gains although it may also multiply losses (leverage).

Risk and Reward Profile

← Typically lower rewards
← Typically lower risk

Typically higher rewards →
Typically higher risk →

This risk and reward indicator is based on past performance data. It may not be a reliable indication of the future risk profile of the fund.

The categorisation of the fund is not guaranteed and may change in the future.

Even the lowest category 1 does not mean a risk-free investment.

Why is the fund in this category?

Funds of category 3 have shown in the past a low to medium volatility. The volatility describes how much the value of the fund went up and down in the past. The units of a fund of category 3 might be subject to low to medium price fluctuations based on the historical volatilities observed.

The following material risks are not fully captured by the risk and reward indicator:

We may invest directly or indirectly a significant portion of the fund into bonds or money markets instruments. If the issuer may fall into insolvency or may suffer economical problems the interest and/or the capital of these assets may not or may not be completely paid and/or the price of the assets may drop.

Charges

These charges are used to pay the costs of running the fund, including the costs of marketing and selling. They reduce the potential growth of your investment.

One-off charges deducted before or after you invest
